

Initial Mockup

Logo Splash/
Loading Intro
Screen

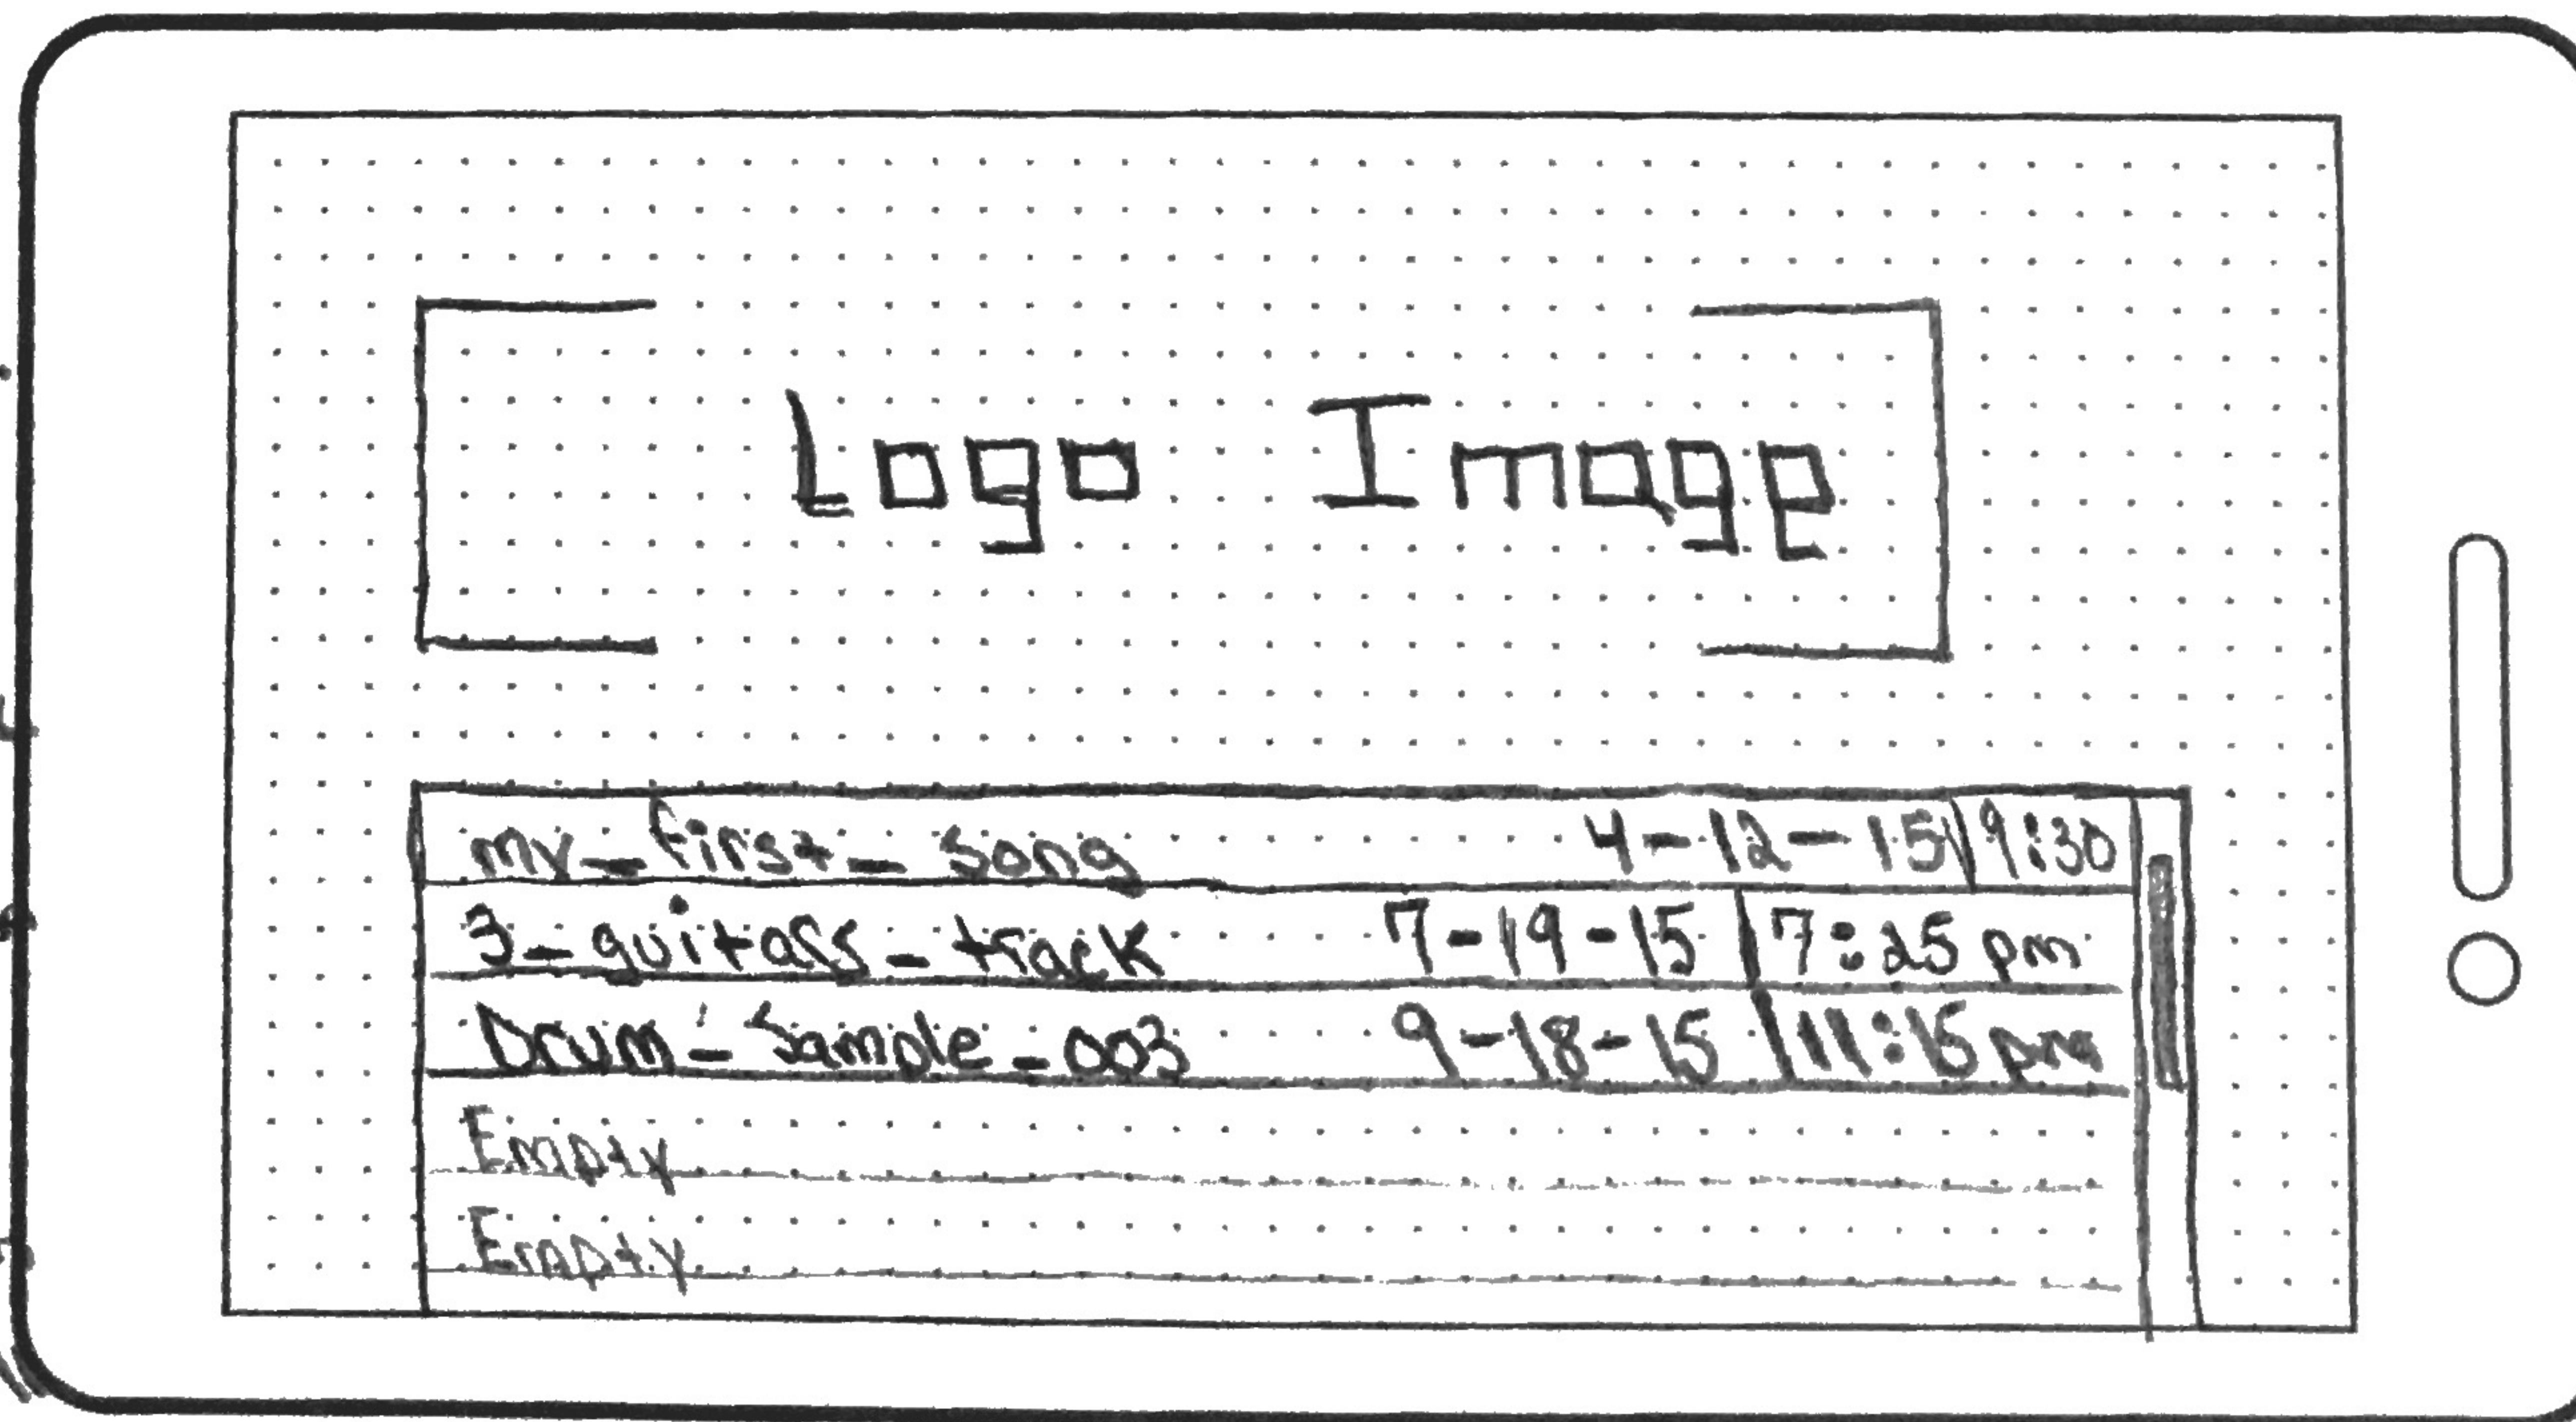

After loading is
complete, logo
stays - action
buttons appear

Load / Export
Session Screen.

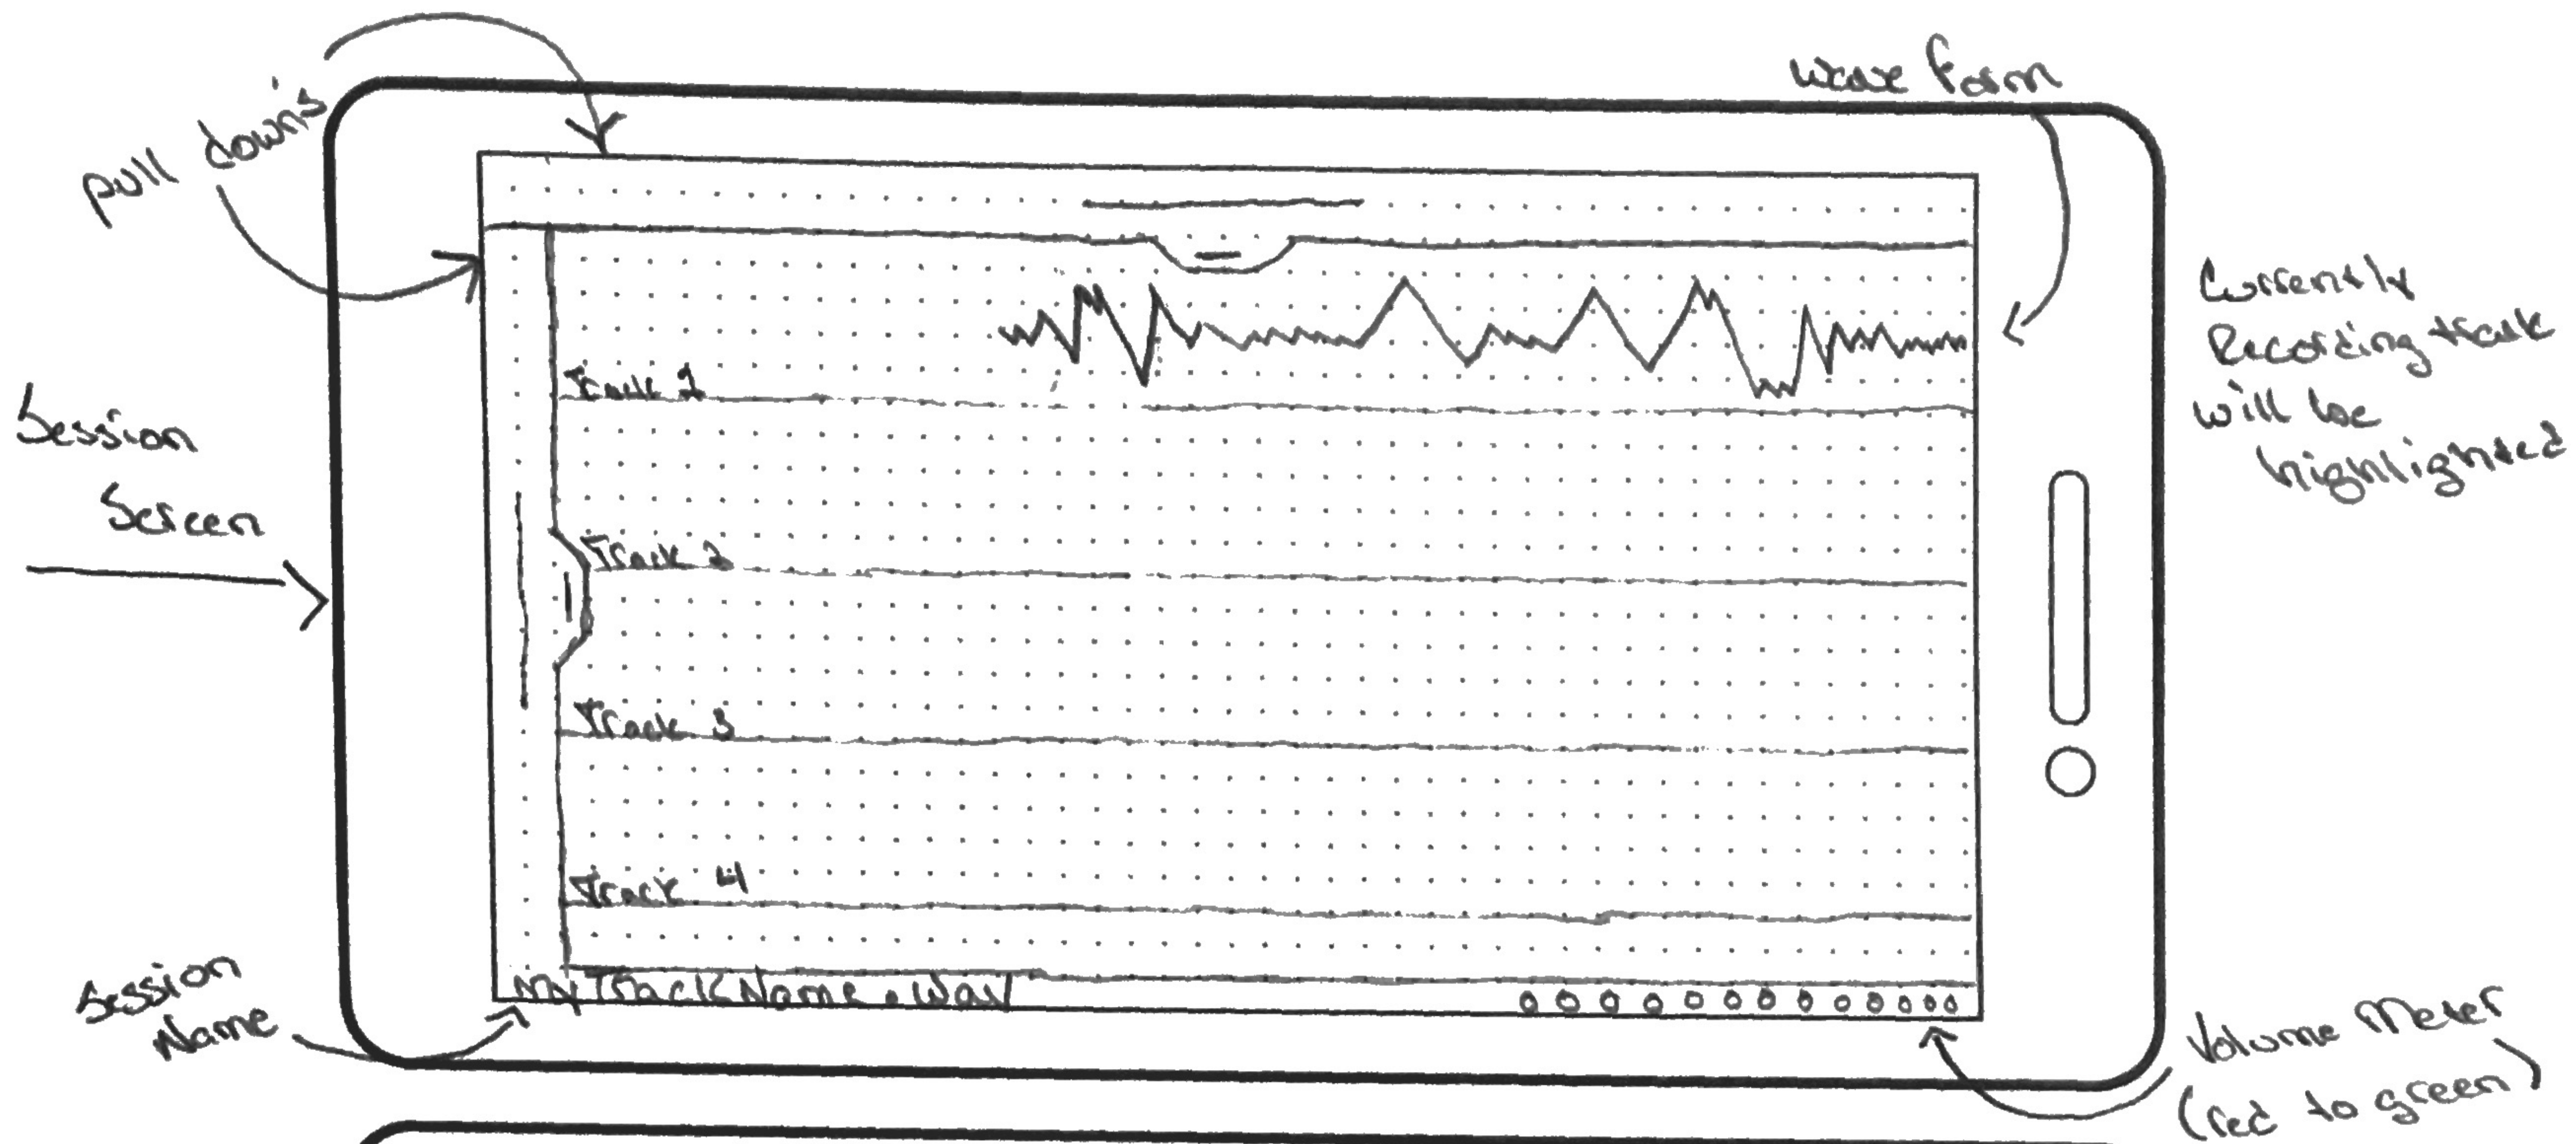

Both loading
and exporting
screens will look
this way -
With load selection
leading to the
selected session,
and export selection
leading to a small
pop up saying:

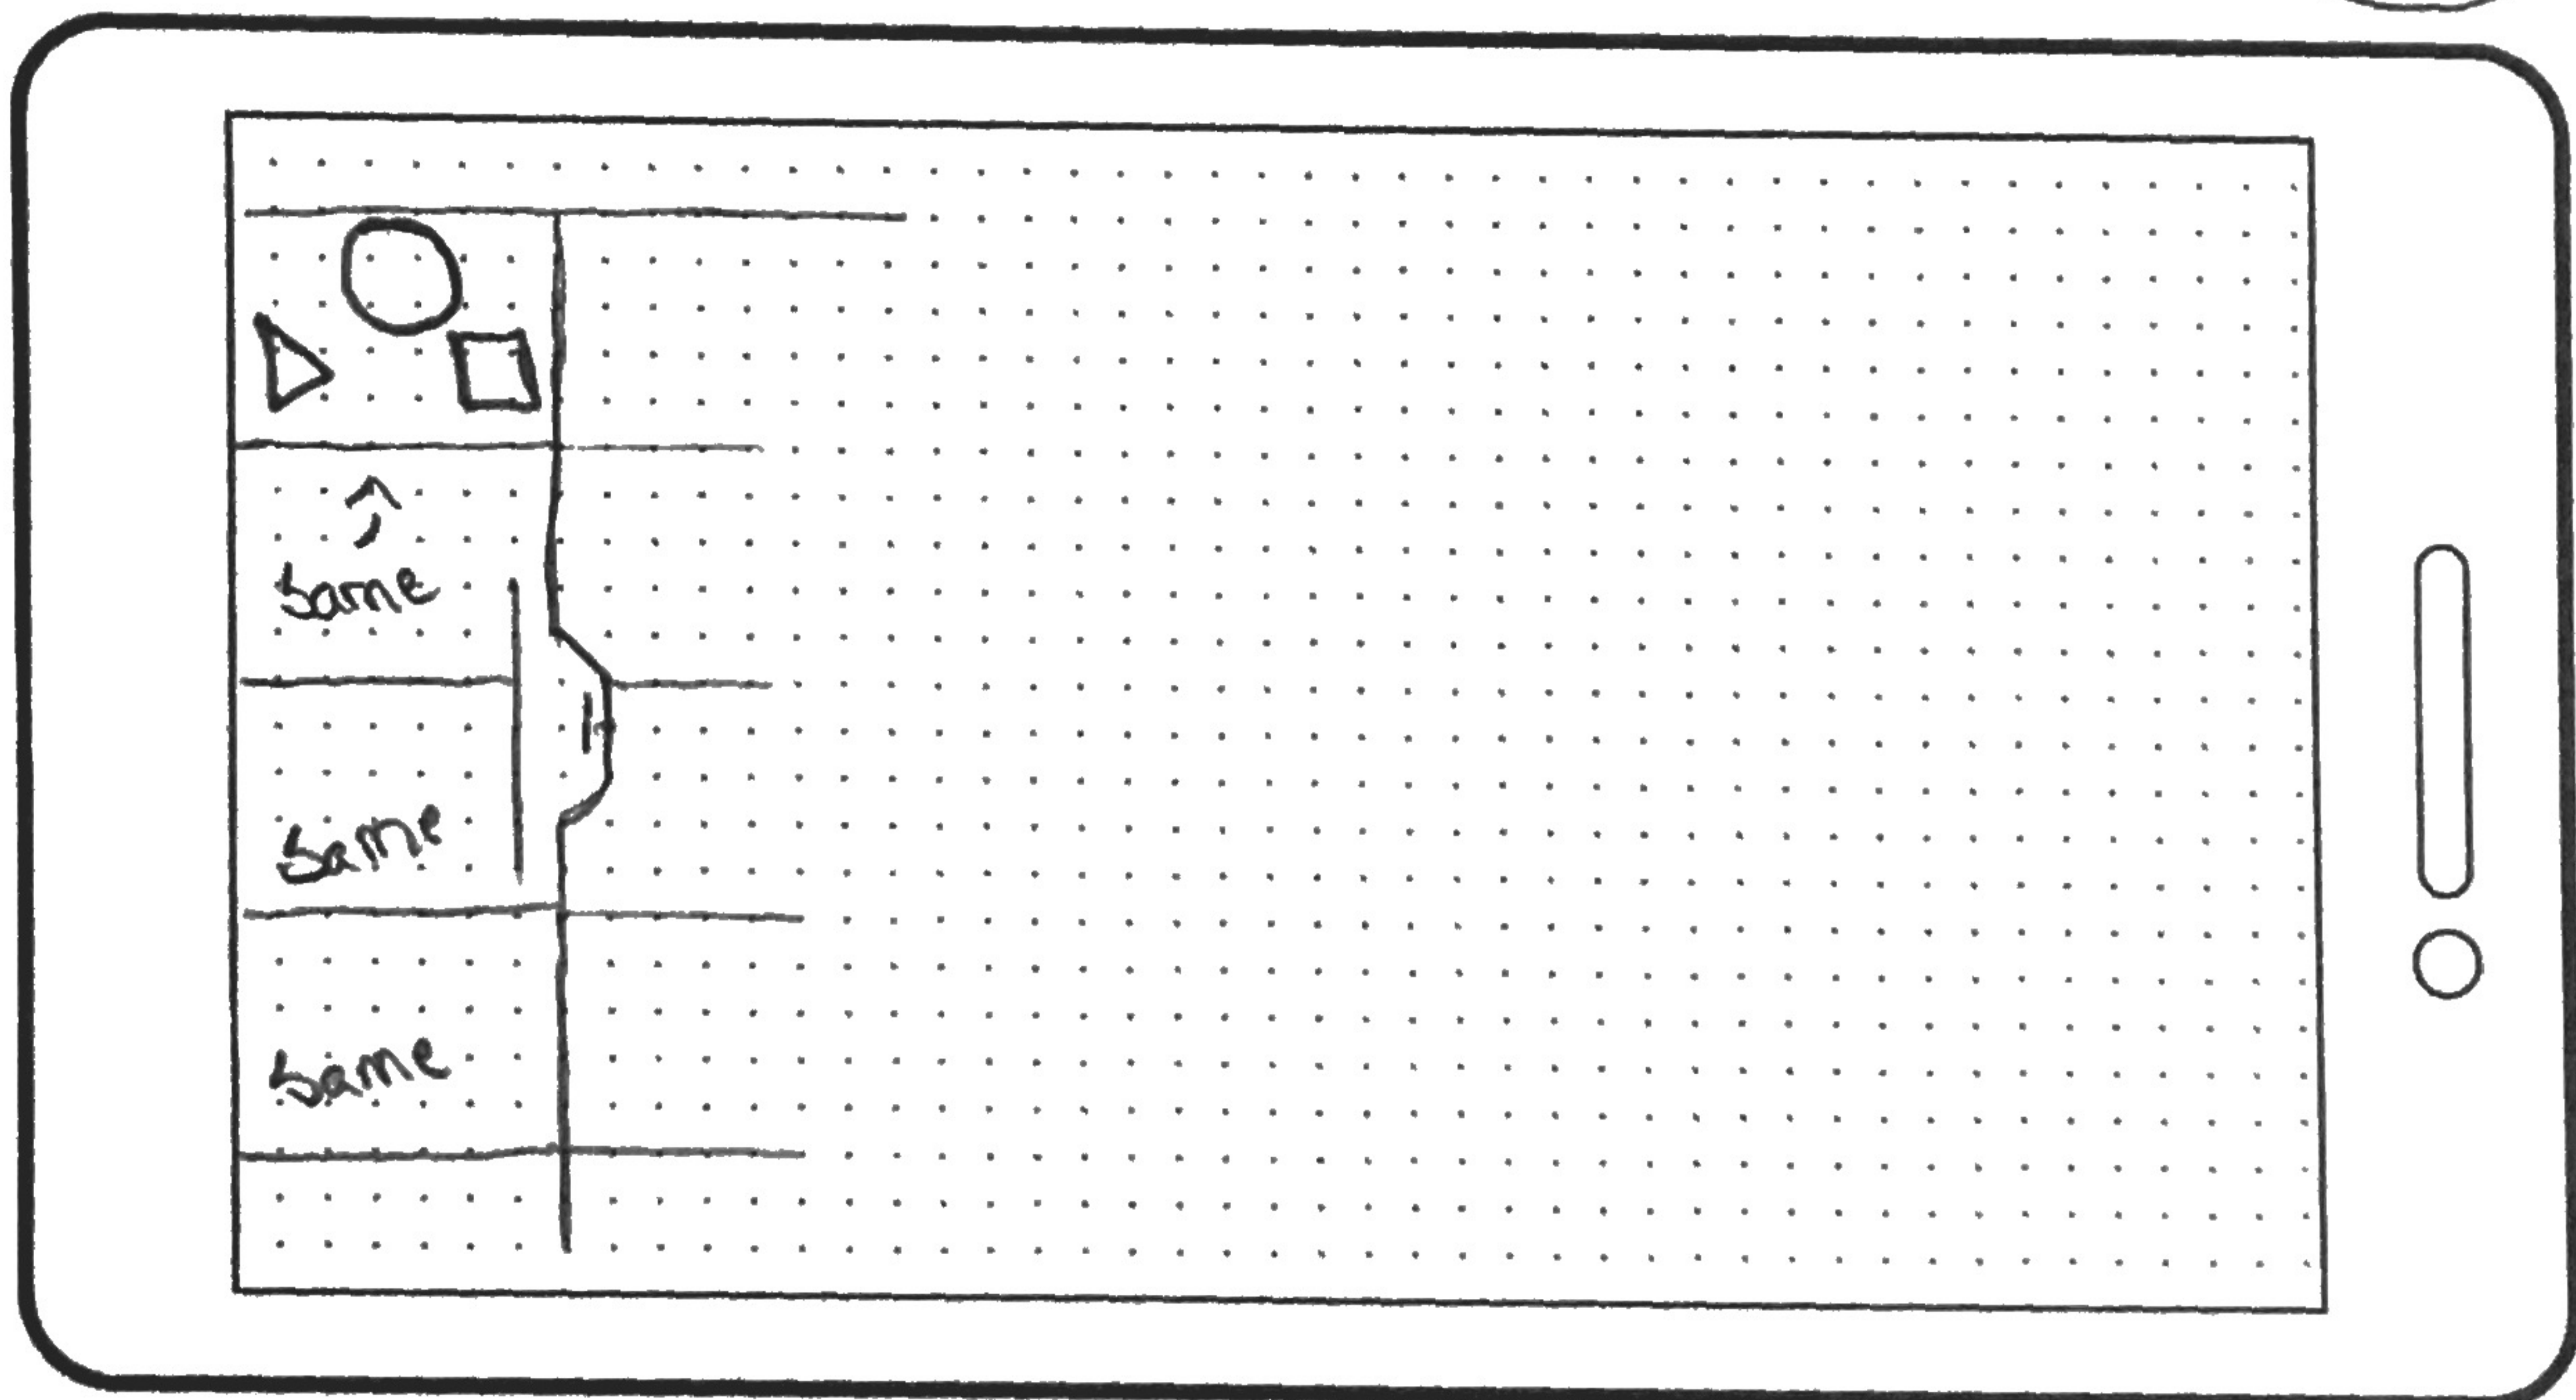

"The session titled 'Title' has been exported as 'Title.mp3' to :/location"

Initial Mockup

Android phone ... after user chooses new/existing file :

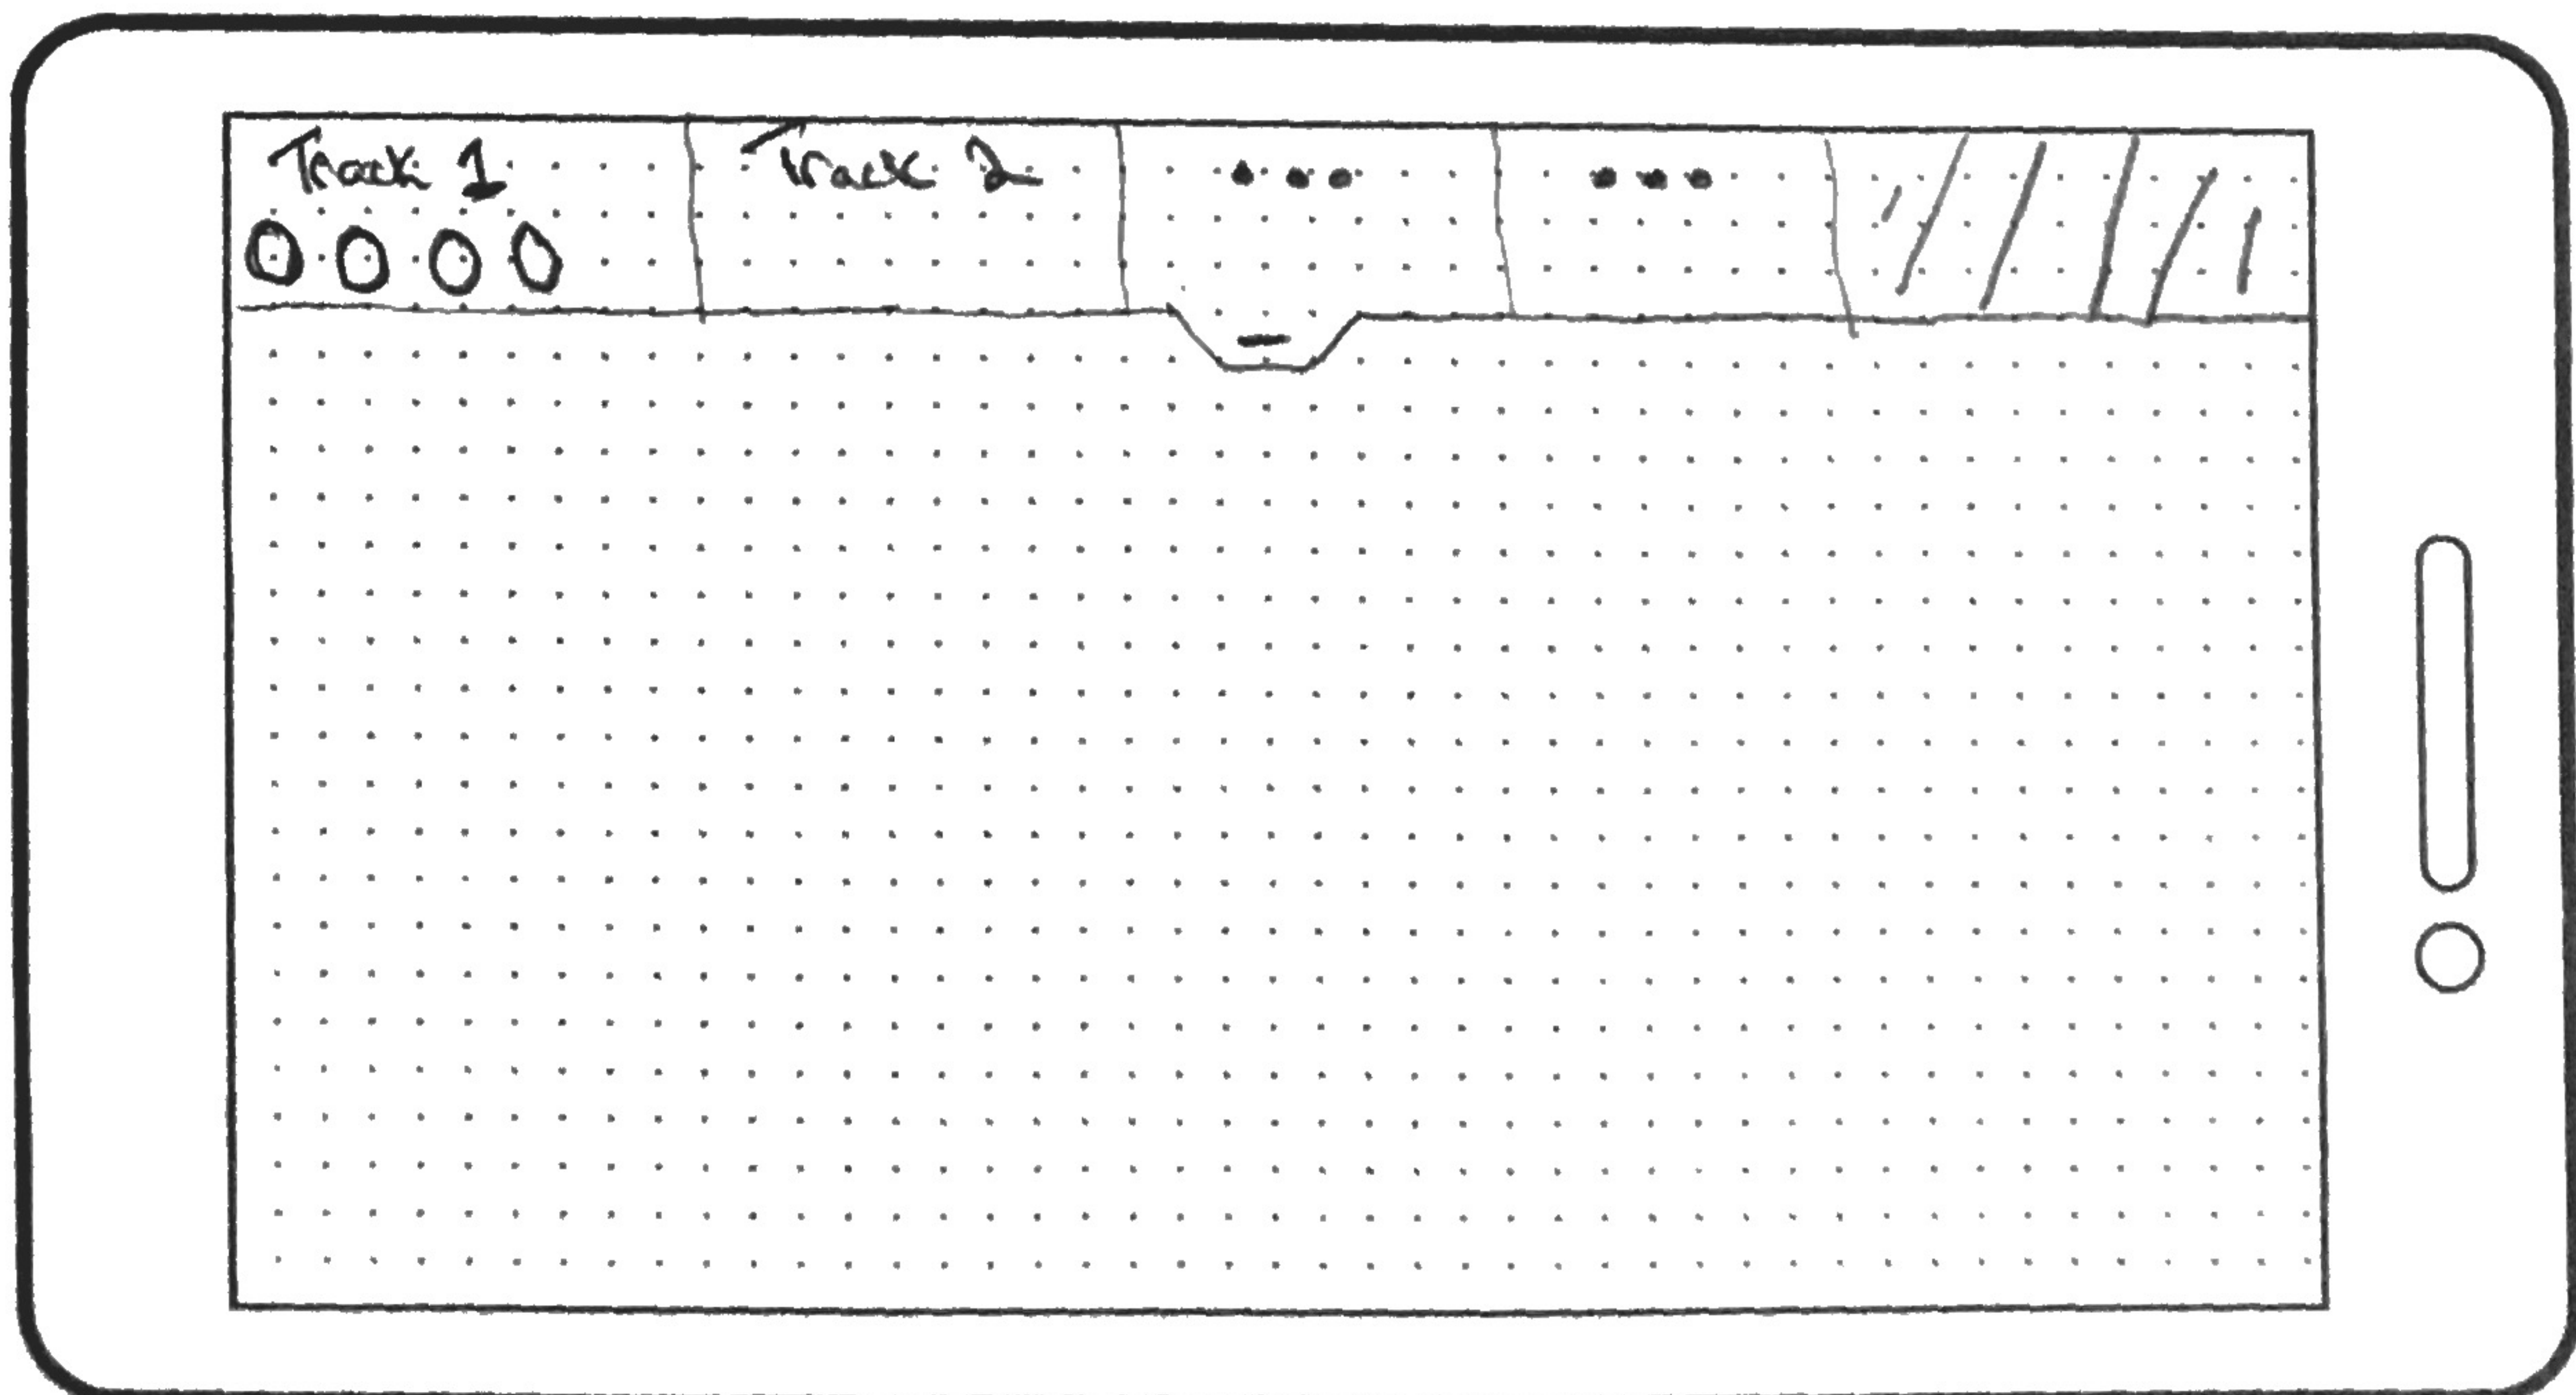

Left Pull Menu
Record/
Play/
Stop
Per track

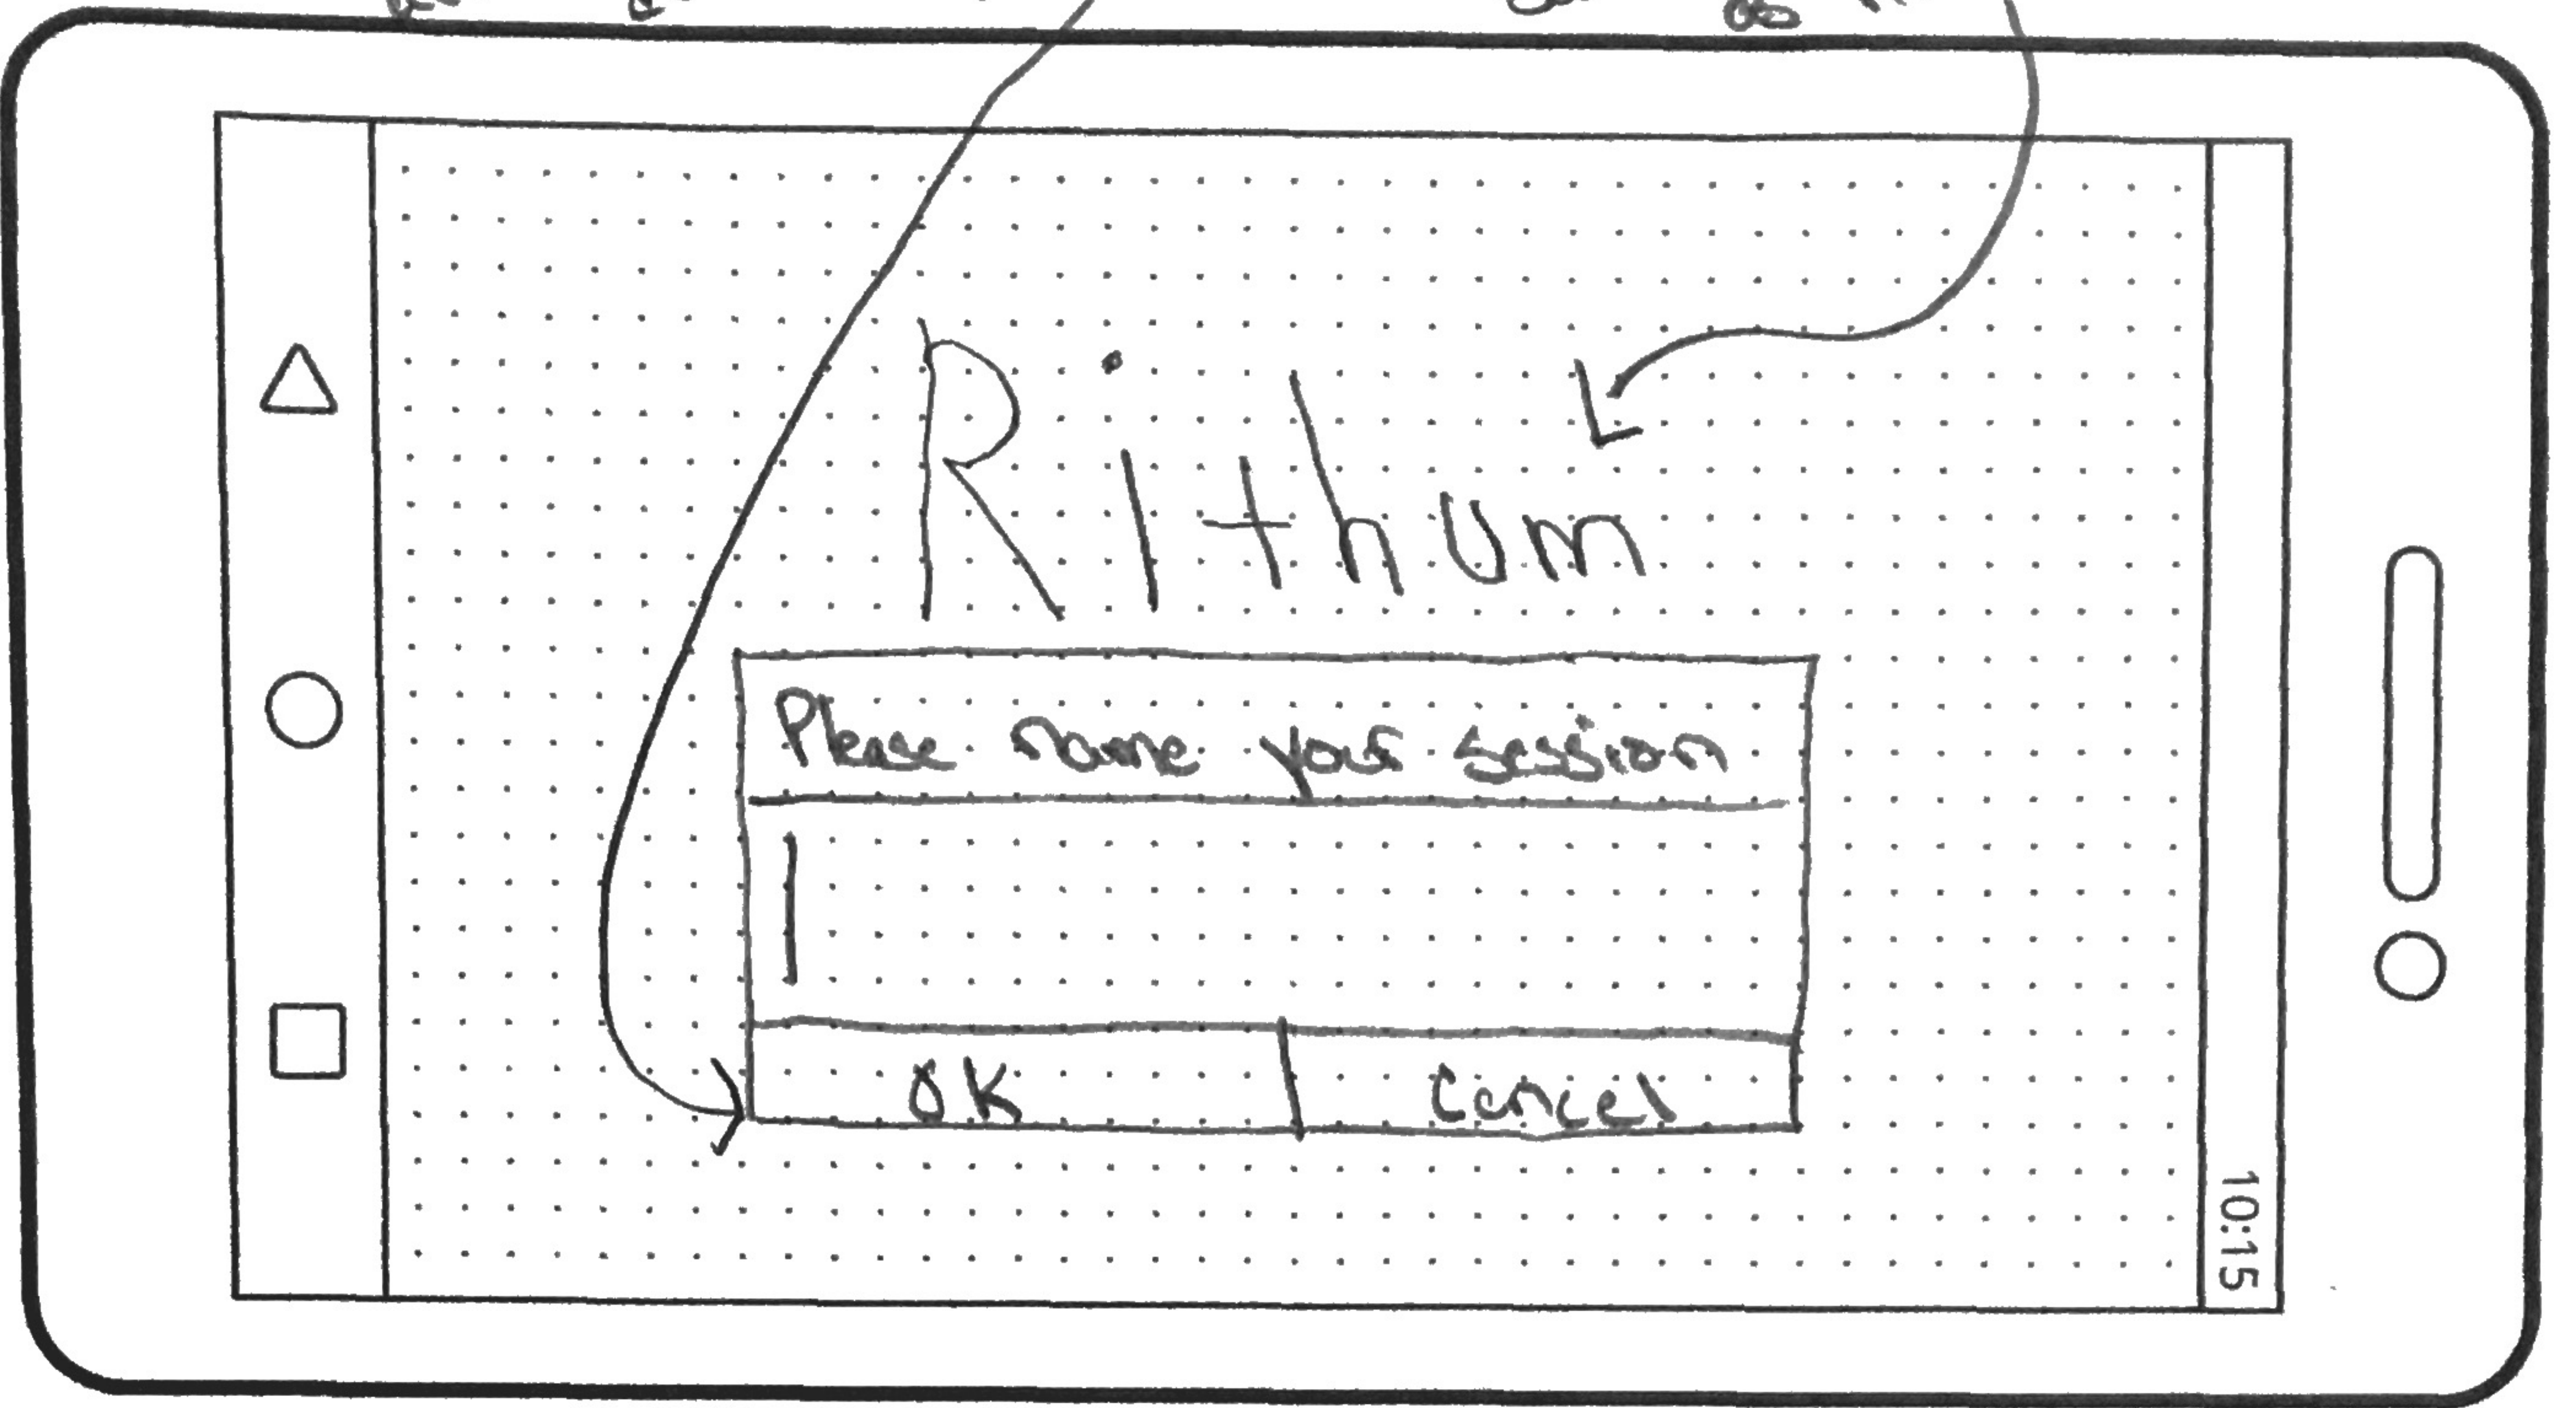

Top Pull Menu

Buttons for
* loop
* delay
* reverb
* distortion
* ... etc...?
per track

We didn't have alternate quality / directory functionality yet

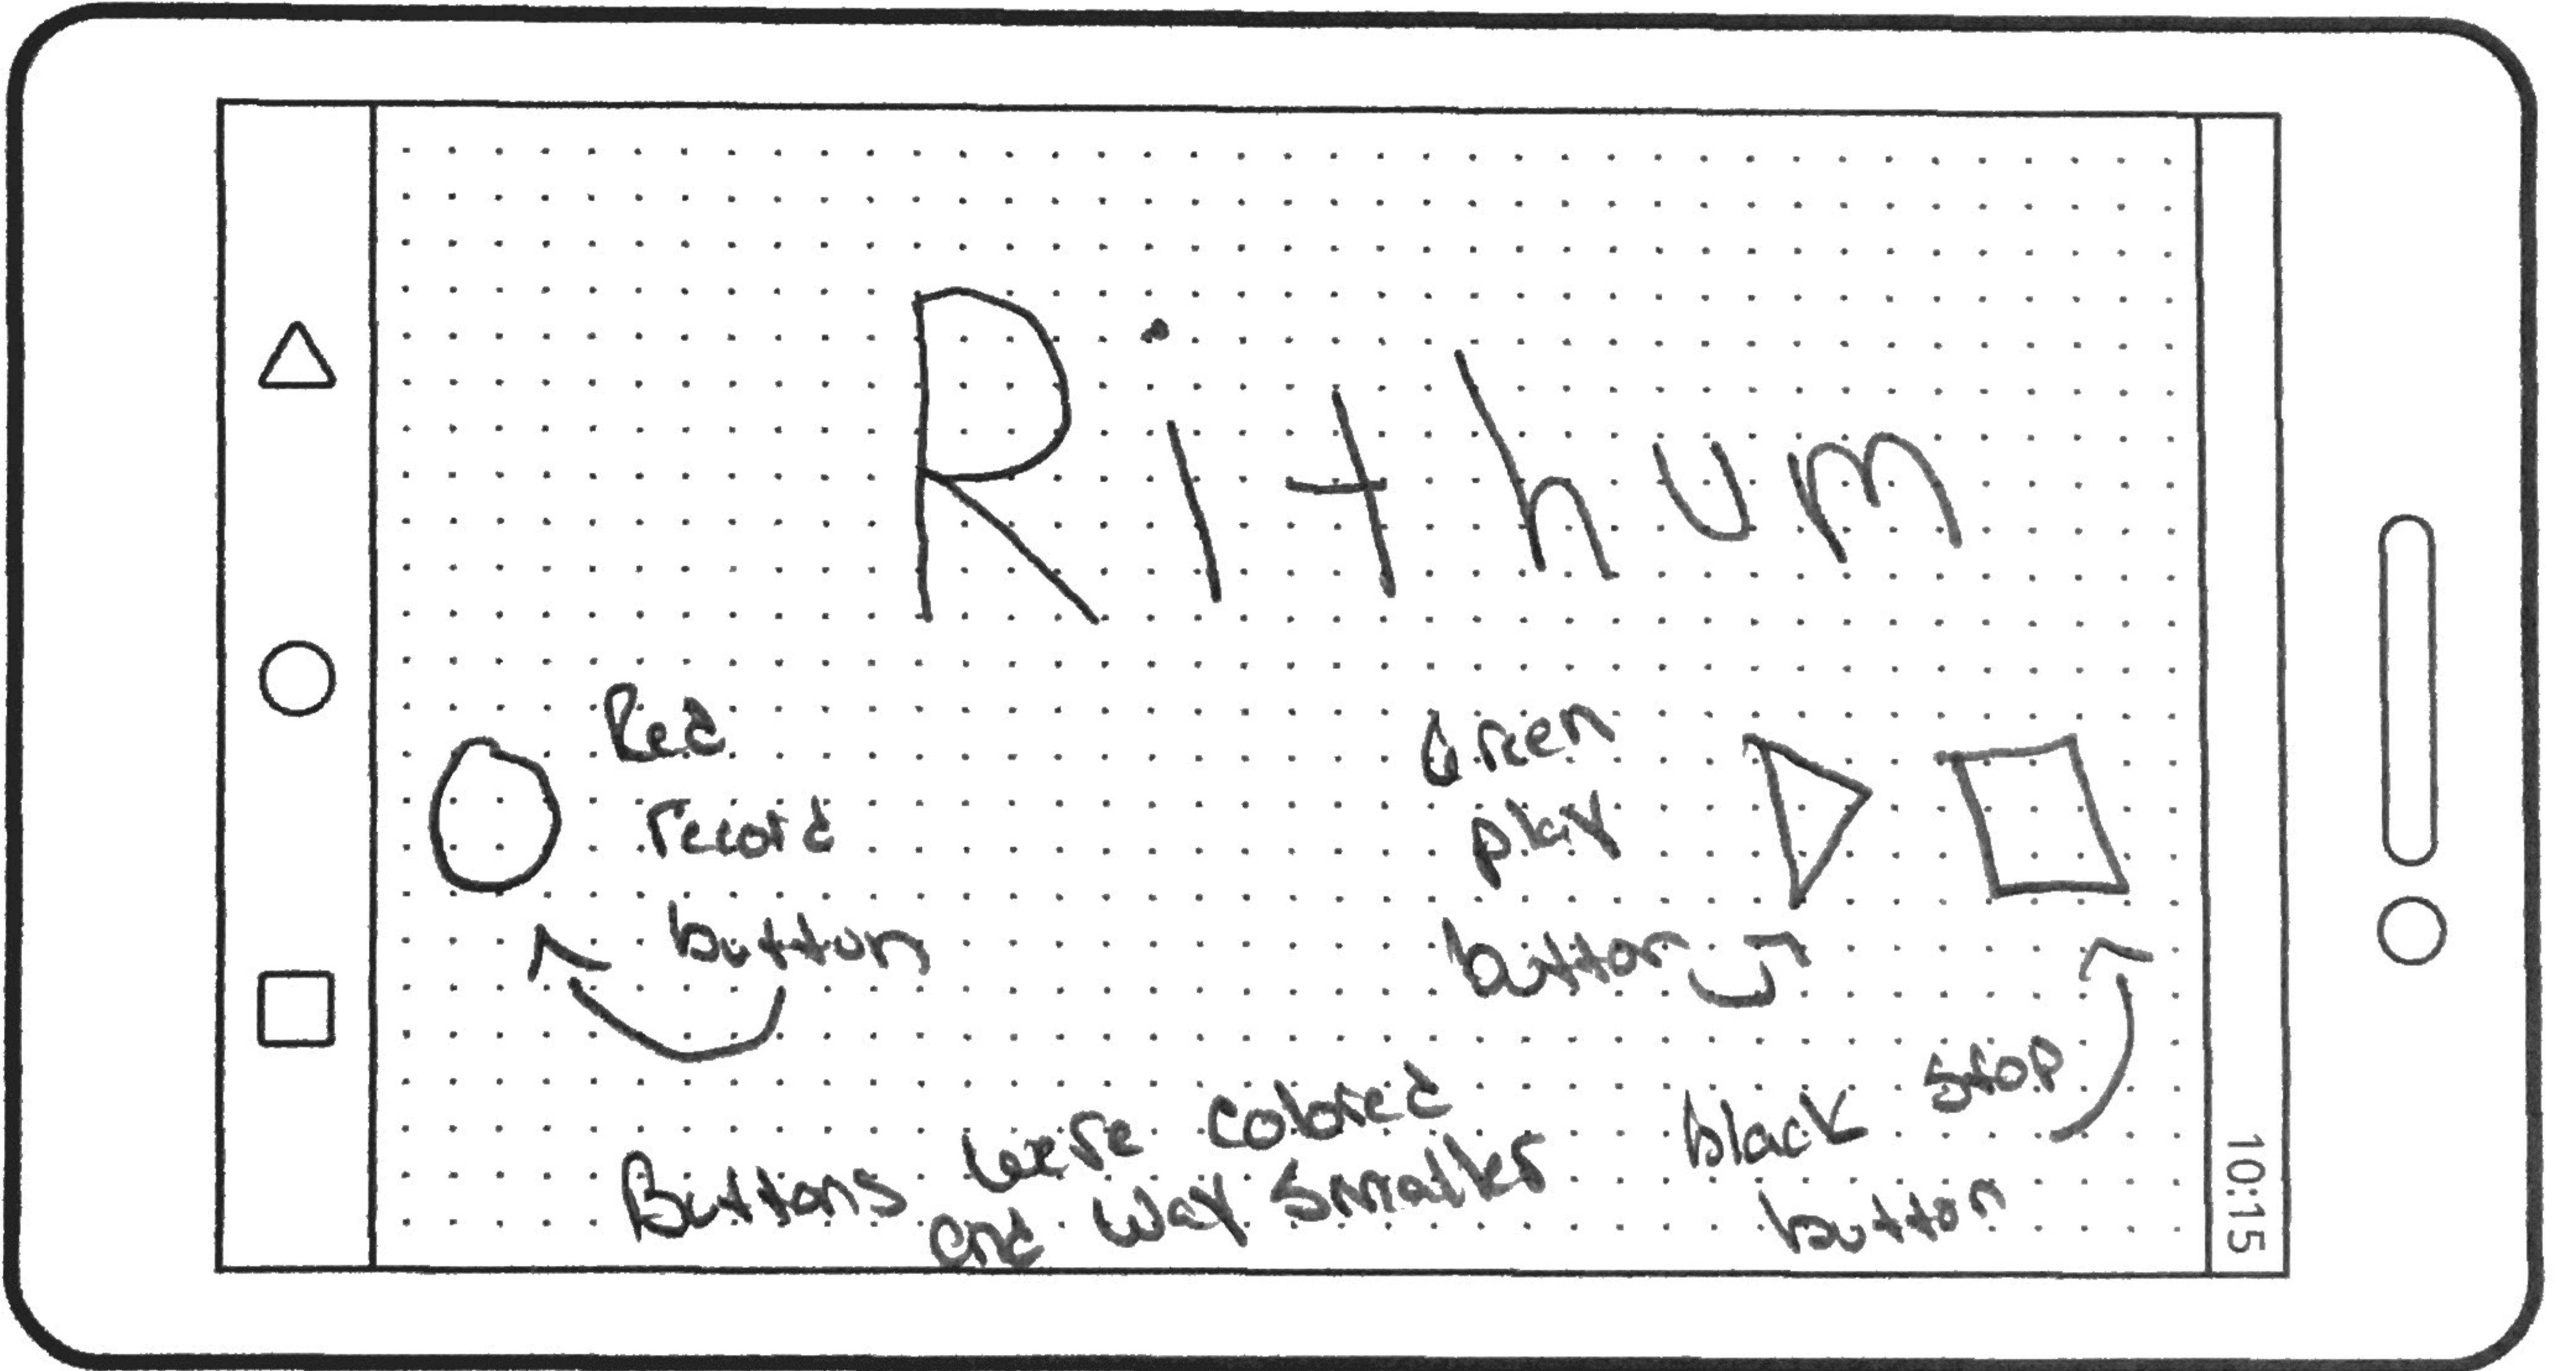

Same logo font as final version

1

Daniel:

We didn't take screenshots of the dev major version of the app (but is on the other made up sheets, 3rd is the final version we use submitting and can also be seen in workflow screenshots). So here I've drawn what the dev version looked like.
